^Hand inserting must be discussed with site in advance. Small run jobs may be able to be accommodated however large circulation jobs cannot. (Requires more time and labour)

General Rules for ALL Sites

Number of inserts dependent on the total number of insert pages and number of inserts in the editions. There is no guarantee that the insert will fall in the exact centre of the book. Likewise the order of inserts in the book will be determined by the print site. As inserting is a mechanical process there is no guarantee of 100% strike rate. Strike rate may be impacted by the number, size and quality of inserts. At all times the print site reserves the right to cease an insert if production deadlines are being adversely affected. Inserts that arrive in poor condition or outside of specifications, may be refused by the print site.
